Bengaluru, India

SUMMARY

B.Tech student in Artificial Intelligence and Machine Learning at DSCE, Bengaluru, with strong technical and creative skills. Experienced in leadership, event management, team building, hackathons, and real-world problem-solving projects. Passionate about sustainability, data-driven innovation, and developing scalable solutions using Python, Arduino IDE, Java, and modern analytical tools.

EDUCATION

Dayananda Sagar College of Engineering (DSCE) , Bengaluru	2023 – 2027
B.Tech in <i>Artificial Intelligence and Machine Learning (AIML)</i>	CGPA: 9.4 (Current)
St. Mary's Academy , Saharanpur (UP)	2020 – 2022
CBSE Board	Percentage: 92.3
Infant Jesus School , Saharanpur (UP)	2020
ICSE Board	Percentage: 94

TECHNICAL SKILLS

Languages: Python, Java

Tools: Power BI, Git, GitHub, VS Code, Raspberry Pi

Concepts: Machine Learning, Data Analysis, Software Engineering, DBMS, IoT Systems, Embedded Systems

Interests: Sustainability, AI for Social Good, Hackathons, Entrepreneurship

EXPERIENCE

SharpGurus Pvt. Ltd.	<i>Product Designer (Trainee) — Apr 2025 – Present</i>
– Working on UI/UX and product design optimization for client and in-house products.	
– Collaborating with cross-functional teams to enhance user experience through data-driven insights.	
– Learning industrial product design, workflow, and development cycles.	
Havells Innovation Cell	<i>BLE 5.4+ Developer — 2025 – Present</i>
– Contributing to the development of advanced BLE 5.4+ control using Periodic Advertising with Responses (PAwR).	
– Focused on energy-efficient communication systems for smart home and IoT devices.	
– Building prototypes for next-gen lighting control and IoT connectivity.	
ISRO Student Satellite Program	<i>Research Associate — 2025 – Present</i>
– Working on onboard data systems and telemetry design for student satellite development.	
– Involved in testing modules for power distribution and communication payload integration.	
NT Medical Electronics	<i>Research Intern — 2025 – Present</i>
– Contributing to a project on fetal anomaly detection and biomedical signal analysis.	
– Developing ML models for real-time analysis and early anomaly prediction in fetal monitoring systems.	

PROJECTS

Military Monitoring and Safe Zone Mapping System	2025 – Present
Winner: Defense Innovation Hackathon 2025 (1st Place)	
– Developed a real-time IoT-based system for tracking personnel safety and mapping evacuation zones during military operations.	
– Integrated multiple sensors and Raspberry Pi for live monitoring and geo-mapping.	

- Built a prototype interface to visualize field data and assist in emergency response and mission planning.

Sustainable Automotive Emission Mitigation Using Algal Photobioreactors *2025*

Winner: Sustainability Hackathon 2025 (GreenTech Category)

- Designed a retrofit exhaust filtration system using algae to absorb CO₂ from vehicle emissions.
- Integrated IoT sensors and Raspberry Pi for real-time monitoring and data logging.
- Patent filed under Green Energy category for sustainable emission reduction technology.

Univibe – Cross-Community Platform for Students *2023*

- Developed a community-driven web platform connecting students across colleges and departments.
- Enabled event discovery, discussions, and collaboration based on shared interests.
- Built using React.js, Node.js, Express.js, MongoDB, and JWT Authentication.

PATENT / RESEARCH WORK

AeroDrive – Smart Aerodynamic Enhancement for Electric Vehicles *Filed – 2025*

Patent: Filed under Green Energy and Sustainable Transportation (Innovation Challenge Finalist)

- Developed a system designed to enhance the aerodynamic efficiency of electric transportation vehicles.
- Uses intelligent airflow control and dynamic component adjustment to reduce drag and energy consumption.
- Focused on improving vehicle range and overall efficiency through embedded system integration.
- Patent filed as part of a 2nd-year mini project.

CERTIFICATIONS

Digital Marketing Fundamentals — Google

Certified Power BI Expert — IIT Delhi

Certified Entrepreneur — E-Cell IIT Bombay

Multiple Hackathons Winner

Multiple times Winner/Runner-up in Badminton

ACHIEVEMENTS

- Winner of multiple national-level hackathons for projects like AeroDrive, Algae CO Capture, and Military Mapping System.
- Campus Mantri for GFG – engaged in event outreach and student community building.
- Selected as a Tech Lead in TCC (inter-department committee).
- Part of core team for department-level hackathon “Aventus.”
- Active contributor to research and innovation in sustainable, defense, and medical technology domains.
